

Listings Management

1 866 411 4411

Build your online presence. Improve listings: accuracy and consistency on hundreds of sites.

Listings Management ensures your business information is accurate and consistent across the web.

Our easy-to-use dashboard helps you take control of your business listings and protect your brand online

Create and maintain business listings with one click. Build an online presence on dozens of search engines, social networks, business directories and more.

Why do you need accurate listings?

Your potential clients need accurate information to find your business the moment they're looking to make a purchase. Incorrect business information leads to lost sales opportunities, frustrated customers, and weaker search rankings. That's why having accurate information on different platforms is a basic digital marketing need for any business.

Save time. Listings Management lets you update all your business information from one dashboard instead of making changes on each of them, saving you a significant amount of time.

78%
of local-mobile searches result in offline purchases.
Can your business be found?*

Listings Management is included in all of our packages.
